FROSTY OAKS WHITE IDEAL x — This is an extremely smooth, well-balanced young bull. He possesses the trimness, soundness and muscle that a modern beef sire should have. His present weight is 1,125 pounds with an average lifetime daily gain of 1.9. But . . . don't be misled . . . this is mostly growth and natural muscling as we have been feeding him only about 40 days. Herd federally accredited.
